PROPERTIES

UMITAN EZ / PP pow. is a classic bating for fine leathers type calves and kids, which cleans the flower making fine and elastic. UMITAN EZ / PP when used at low percentages is used for the processing of hides which must keep a feel supported, but if used at higher dosage is used for soft leather type tassel and softy. The action of UMITAN EZ / PP is still strong, and should be followed carefully processing times, which should never be too long.

HOW TO USE

We list below the doses recommended for some of the most common types of leathers:

- ◊ Calves for upper is used from 0.4% to 0.8%
- ◊ Bovine hides for uppers using from 0.4% to 0.8%
- ◊ Bovine hides for nappa is used by 1% to 1.5%
- ◊ Kids using 1.5% to 2%
- ◊ Montoni for upper or lining is used from 0.6% to 0.8%

◊ Pigs clothing using 1.5% to 2.5%
