di Intiso Pietro Livio

TECHNICAL DATA SHEET

UMITAN I / I LIQ.

FATTENING WATER REPELLENT

CHEMICAL COMPOSITION

Fattening based phosphate esters

FEATURES

Appearance:	white paste
Active substance:	40 - 45%
pH in emulsion at 10%:	7 - 8
Ionic charge:	anionic
Light fastness:	good
Stability to chrome:	no
Stability to acids:	no

PROPERTIES

UMITAN I / I Liq is a fattening able to impart hydrophobic properties to the chrome-tanned leathers. UMITAN I / I also possesses excellent quality can be used as softeners and fattening basic and applied as such. UMITAN I / I is resistant to light, is poorly removable and is suitable for the production of articles for the footwear, leather for clothing suede splits.
