## TECHNICAL DATA SHEET

### UMITAN I / LC LIQ.

Phospholipid VEGETABLE Emulsifiable

#### CHEMICAL COMPOSITION

Fattening anionic vegetable

#### FEATURES

Appearance:	light brown paste
Fat:	50-55%
pH in solution at 10%:	7 - 8
Ionic charge:	anionic
Stability to chrome:	no
Stability to electrolytes:	no

#### PROPERTY

UMITAN I / LC Liq is a fattening that gives the treated hides a remarkable lightness. UMITAN I / LC imparts a good softness, because, besides having a proper penetration into the leather, it stops at the surface in the right measure to give the skin a particular hand and characteristic. UMITAN I / LC is used in mixture with other fatliquors for the production of all types of leather, as well as for the processing of white leathers, thanks to its good resistance to light.
