

**INTISO chemicals**

di Intiso Pietro Livio

## TECHNICAL DATA SHEET

### UMITAN RS / CAM LIQ.

RESIN RETANNING  
CHEMICAL COMPOSITION  
Acrylic polymer concentrate

#### FEATURES

Appearance:	colorless viscous
pH in solution at 10%:	5.5 - 6.5
Ionic charge:	anionic
Solubility:	in water complete
Concentration:	25-30%
Compatibility:	natural with synthetic tannins with polyacrylates, sulphonated oils sulfitated
Storage:	6 months in normal conditions

#### PROPERTY

**UMITAN RS / CAM LIQ.** Can be used alone or in combination with natural and synthetic tannins, which are added to the same bath. UMITAN RS / CAM imparts to leather grain firmness and exceptional fullness and roundness of hand. The percentages of use are from 2 to 5% on the weight of the hides shaved, depending on the type of leather and of their thickness. It is also used at the end after the fattening for maximum effect.
