

INTISO chemicals

di Intiso Pietro Livio

TECHNICAL DATA SHEET

UMITAN RS / CU LIQ.

RESIN RETANNING

CHEMICAL COMPOSITION

High molecular plastic polymer chemically modified to make it polar

FEATURES

Appearance:	clear liquid pink
pH in solution at 10%:	5 - 6
Ionic charge:	anionic
Solubility:	in water complete
Concentration:	10-15%
Compatibility:	natural with synthetic tannins with polyacrylates sulphonated oils sulfitated
Storage:	6 months in normal conditions

PROPERTY

UMITAN RS / CU LIQ. Can be used alone or in combination with natural and synthetic tannins, which are added to the same bath. **UMITAN RS / CU** imparts to leather grain firmness and exceptional fullness and roundness of hand.

The percentages of use are from 3 to 6% on the weight of the hides shaved, depending on the type of leather and of their thickness. It is also used at the end after the fattening for maximum effect.
