## TECHNICAL DATA SHEET

# UMITAN RS / ML POLV.

RESIN RETANNING

CHEMICAL COMPOSITION

Product made from melamine resin

## FEATURES

Appearance:	fine powder clear
pH in solution at 10%:	7.5 - 8.5
ionic charge:	anionic

## PROPERTY

UMITAN RS / ML powder retanning is a resin based on melamine, which confers to the leather round hand, full, flower end and closed, especially in the most empty parts of the leather. UMITAN RS / ML given its anionicity, is compatible with all tanning agents and dyes anion-active. UMITAN RS / ML can be used for nubuck and suede items because it improves the ability porbeagle.

## HOW TO USE

We recommend using after neutralization being the UMITAN RS / ML is not stable at pH less than 3 and not resistant to mineral tanning.
