TECHNICAL DATA SHEET

UMITAN RS / ML CONC. POLV.

RESIN RETANNING CHEMICAL COMPOSITION

Product based on melamine resin concentrated

FEATURES

Appearance:	clear powder
pH of the emulsion at 10%:	8-9
ionic charge:	anionic

PROPERTY

UMITAN RS / ML CONC. powder retanning is a resin based on melamine, which confers to the leather round hand, full, flower end and closed, especially in the most empty parts of the leather. UMITAN RS / ML CONC. given its anionicity, is compatible with all tanning agents and dyes, anion-active. UMITAN RS / ML CONC. can be used for nubuck and suede items because it improves the ability porbeagle.

HOW TO USE

We recommend using after neutralization being the UMITAN RS / ML CONC. not stable at pH less than 3 and not resistant mineral tanning.
