

INTISO chemicals

di Intiso Pietro Livio

TECHNICAL DATA SHEET

UMITAN SA / TSF POLV.

SEQUESTRANT

CHEMICAL COMPOSITION

Mixture based on polyphosphates

FEATURES

Appearance:	white powder
pH in solution at 10%:	8 - 9
Solubility:	soluble

PROPERTY

UMITAN SA / TSF pow has been developed for specific market needs, where it was requested that a cheap product could still have an effect on the sequestering of calcium and magnesium salts.

UMITAN SA / TSF can be used to soften hard water is soaking in that in the washing of skins and in any case where access to a sequestering action on the cations mentioned above.

HOW TO USE

UMITAN SA / TSF in hard water is added to the baths to wash the hides because it varies from 0.2 to 0.3% in order to prevent the precipitation of insoluble carbonate on the flower. UMITAN SA / TSF in washes of wet blue eliminates stains, regularizing thereby improving the surface and the dye.
