

INTISO chemicals

di Intiso Pietro Livio

TECHNICAL DATA SHEET

UMITAN TA / SB LIQ.

RE-TANNING

CHEMICAL COMPOSITION

The condensation product of aromatic sulfonic acids

FEATURES

Appearance:	syrupey liquid
pH in solution at 10%:	3.5 - 4.5
% active substance:	about 40%

PROPERTY

UMITAN TA / SB liq. is a tanning agent based synthetic phenolic producing full leathers and white. Can be used in tanning, alone or in combination with vegetable tannins and processes for retanning. The leathers tanned with only UMITAN TA / SB have soft leathers, full and clear. Used in adequate levels of UMITAN TA / SB allows for any level of softness and fullness. It is suitable for processes of vegetable tanned cowhide with synthetic linings and leather.

It can be also used for tanning hides for clothing, soft vitelloni retanning chrome, buffed and full grain, in the process of tanning with vegetable tannins for uppers, waterproof military boots, etc ..
